

PROFESSIONAL SUMMARY

Emmanuel is a skilled individual aspiring to kickstart a career in data analysis and web development. adept in front-end technologies; dedicated to creating web solutions that are easy to use and converting complicated data into applicable insights, eager to take on new challenges in the fast-paced domains of web development and data and to contribute to a collaborative team.

EDUCATION

University of Nigeria, Nsukka [UNN] Programme: Bachelor of Science in Accounting Academic Standing : Second Class Upper [4.45/5.0] Relevant Coursework : Financial Accounting, Advanced Taxation, Auditing, Financial Management, Business Policy as well as other courses	2023
KodeCamp Bootcamp Programme: Diploma in Web Development : Front-End Development	2023
Pragmatic Works Programme: Diploma in Data Analytics: Power BI	2023
Dave Computer Institute Programme: Diploma in Computer Application	2013

EXPERIENCE

KodeCamp 3.0 Bootcamp

React - Intermediate

- Created visually appealing and responsive user interfaces by developing and styling web pages in HTML and CSS.
- Git was used for version control, managing code changes, and efficiently collaborating in a team environment.
- To simplify the development process, I gained hands-on experience with popular front-end frameworks such as Bootstrap, Tailwind CSS, and React.js.
- Familiarity with web development tools such as Visual Studio Code, Chrome Developer Tools, and others to improve coding and debugging speed.
- Third-party APIs were integrated to fetch and display data, expanding the functionality of web applications.
- Developed teamwork and gained experience in a collaborative coding environment by working on group projects with peers.
- Developed a personal portfolio that demonstrated my ability to work with front-end developers, my proficiency with code, and my finished projects.
- successfully managed project assignments and timeframes, showcasing organizational and time management abilities to produce high-caliber work.

Linkedin Learning

Javascript

- Completed complete modules covering JavaScript fundamentals such as variables, functions, and control flow.
- Acquired expertise in manipulating the Document Object Model (DOM) for dynamic web page interaction.
- Mastered current JavaScript concepts such as arrow functions, destructuring, and template literals introduced in ECMAScript 6 (ES6).
- Successfully applied JavaScript abilities to real-world projects, improving interactivity and user experience on web apps.
- used JavaScript to enable responsive design, guaranteeing the best possible user experience on a range of screens and devices.
- Solved cross-browser compatibility issues by designing JavaScript code that works reliably across multiple web browsers.
- Using Git, I used version control techniques to ensure collaborative and organized development procedures.

CERTIFICATION

- | | |
|--|-----------|
| • React.js intermediate with Kodecamp 3.0 | Dec. 2023 |
| • Power Bi Beginner to Pro Workshop With Pragmatic Works | Oct. 2023 |
| • Javascript Essential Training with Linkedin Learning | Sep. 2022 |

SKILLS AND INTEREST

Language

HTML - Advanced

CSS - Intermediate

Javascript - Intermediate

React.js - Intermediate

Tailwind CSS - Intermediate

Bootstrap CSS - Intermediate

Tools : Figma, Github, Git

Interest : Reading, Coding, Acquiring new knowledge and Volunteering.
